

☀️ 24 HOUR CAR WASH 🌙

at FRANKLIN MAPS

“GREAT” Sums Up My AUTECH Experience!

**Washing
Record-Setting
Numbers of
Vehicles
Daily!**

When Andrew Amsterdam began searching for new car wash equipment to be utilized at his Franklin Maps location in King of Prussia, PA, he obviously demanded durable equipment with superb cleaning abilities, built by a premier manufacturer, holding an industry wide reputation. He found this in AUTECH Car Wash Systems, a leader with 32 years manufacturing experience in the automatic car washing business.

Andy Amsterdam and his son, David, are the enthused behind **24 Hour Car Wash**, serving the King of Prussia market, a suburb of Philadelphia, PA. Located on Henderson Road, with a traffic count of 22,000 cars per day, the Valley Forge Convention Center and the second largest shopping mall in the United States, the Court At King of Prussia, are within five minutes of 24 Hour Car Wash. Add to that various big box retailers, strip malls, restaurants, brand name hotels, apartment/condo complexes and hundreds of homes.

David Rennie of Northeast AUTECH operates his own location in Southern New Jersey outfitted with all of AUTECH's best, namely dual AUTECH EV-1's. Andy and David Amsterdam had found Rennie's Auto Spa and of pointed interest to them was Rennie's all glass structure and the presentation of the AUTECH EV-1's at Rennie's location.

Almost immediately, Andy and David felt they had found the right equipment manufacturer in AUTECH and recognizing Rennie as an owner/operator in AUTECH equipment provided Andy and David with further assurances that AUTECH would

be the right choice for 24 Hour Car Wash.

And so, a completely unique AUTECH installation had its genesis. It would feature two AUTECH EV-1 car wash systems, having the ability to clean with Soft Touch, Touch Free or an awesome combination of both. Andy and David opted to offer a menu of combination washes to their customers, adding options like Pre-Soak, Triple Foam, Bug Buster and AUTECH's Rear Super Clean. All of this is housed in AUTECH's dual 57' Glass Car Wash Structure and operates 24/7, unattended!

Andy simply states, "AUTECH cleaned far better than other car wash equipment that I had reviewed." He further comments that the efforts by AUTECH in layout design, engineered drawings and production/delivery of his AUTECH EV-1 systems, coupled with Northeast AUTECH's expertise and support has been "Great!"

AUTECH is proud to have Andy and David Amsterdam on board! Welcome!
