

TAMIAMI FORD and TAMIAMI HYUNDAI... TWO FLORIDA DEALERSHIPS USING AUTEC AND HAPPY WITH THEIR DECISIONS!

AUTEC's wash quality is evident with each and every vehicle washed at the Tamiami dealerships.

At the Ford Site, AUTEC's system is installed in a bay where hand washing had previously been done.

Both Florida dealerships have the exact same AUTEC systems and are happy with their AUTEC choice!

TAMIAMI FORD and TAMIAMI HYUNDAI are two of the newest Florida automobile dealerships to showcase AUTEC's impressive car wash systems. Tamiami Ford was the first location to incorporate AUTEC with the wash opening in January 2012. The solid, stainless-steel construction of the system was a primary selling point, complemented by AUTEC's reliable service and excellent wash quality. When the time came for a wash at the Hyundai store, AUTEC was chosen once again. August 2014 marks the date that Tamiami Hyundai started washing cars with the AUTEC.

Both locations feature an AUTEC AES-220 Soft Touch Car Wash System, distinctively designed for auto dealers. The Ford store installed the AUTEC in a bay previously used for hand washing cars. AUTEC prides itself on helping auto dealers improve customer satisfaction by providing superior

wash quality and also by reducing the time and labor spent washing cars. The Tamiami Hyundai car wash was new construction and very well-received. Their new equipment washes a vehicle in a single one-minute pass!

The Hyundai site was unique in that they needed to meet some noise abatement requirements. BlueMar, AUTEC's factory-certified service partner, designed a bay long enough to allow for the operation of the wash and the doors, as well as some special door controls to make the doors operate as required. The doors close during the wash cycle and open when the wash is idle. This proved to be a successful configuration for a very specific need. Point being, every car wash installation is not cookie-cutter. AUTEC and BlueMar offer creative solutions to meet the needs of your business.
