## **AUTEC Introduces New Rear Arm Upgrade Designed To More Effectively Clean Rear Windows on SUV's**

AUTEC's new rear arms utilize horizontally mounted "helicopter" style polyflex on rows 1-5. Rows 6 & 7 utilize a smaller 6" hub with longer material (cloth only). Arms are inclined towards the vehicle to better fit the vehicle contour.

This new configuration provides improved coverage on vehicles with sloped rear ends allowing the cloth to reach the top of the rear window and get under spoilers.

The retro price includes new arms (2), arm bearings (8), cloth (rows 6 & 7), polyflex ("helicopter" style - rows 1-5), and all cloth/polyflex mounting hardware.

*\* Polyflex is required in order to utilize this new rear arm upgrade.*

**Horizontally mounted "helicopter" style polyflex on rows 1-5.**

**Rows 6 & 7 utilize a smaller 6" hub with longer material (cloth only)**
