

DCH AUTO GROUP And AUTECH A Winning Combination! **BMW of Bloomfield, New Jersey Latest Installation**

Beginning in 2016, The DCH Auto Group and AUTECH have enjoyed a mutually beneficial and successful relationship with their DCH Toyota of North Brunswick, NJ site and their latest BMW of Bloomfield, NJ install.

BMW of Bloomfield, NJ features AUTECH's AES-220 model soft touch system.

The DCH Auto Group, a subsidiary of Lithia Motors in Medford, Oregon, expressed interest in the AUTECH Car Wash systems for auto dealers at the NADA Convention in 2016.

Immediately following, AUTECH's distributor principal, David Rennie, of Northeast AUTECH, made contact and a mutually beneficial relationship began.

Initially, there arose an opportunity with DCH Toyota of North Brunswick, New Jersey. Northeast AUTECH and AUTECH provided AUTECH's model AES-220 with a spot free rinse and free-standing 45 HP blower. AUTECH's AES-220 is specifically suited for the auto dealer business.

Also, at DCH Toyota of North Brunswick, Northeast AUTECH provides a full preventative maintenance program to keep the car wash in tip-top shape. Doing so, has allowed the AUTECH equipment to experience almost zero down time, since being placed in operation.

Most recently, we congratulate DCH Auto Group on the installation of another AUTECH AES-220 car wash at **BMW of Bloomfield, New Jersey**.

This AUTECH installation features: remote chemical tire applicator, 10 HP rocker panel blaster, safe tag protector, polyflex foam media, rear super clean, spot free rinse, water reclamation and a free-standing 60 HP blower. All of these combined produce exceptionally clean vehicles, regardless of the make, model or shape.

Like Toyota of North Brunswick, AUTECH equipment at BMW of Bloomfield is protected by a full preventative maintenance program provided by Northeast AUTECH.

From site specific MEP drawings to contractor meetings to AUTECH equipment installation, AUTECH stands uniquely able to assist the auto dealer in providing exceptionally clean cars and ultimately happy customers.
